What would happen if a lion and a tiger met each other? What if they were both hungry? What if these two big cats had a fight? Who do you think would win?

SCIENTIFIC NAME OF LION

“Panthera leo”

Meet the lion. Lions are mammals. Their fur is one solid color—tan, brown, or dark tan. They have no stripes or spots on their fur. Lions have an unforgettable face.

SCIENTIFIC NAME OF TIGER

“Panthera tigris”

DID YOU KNOW?

Lions and tigers look different on the outside. But inside they are similar. Both cats have excellent eyesight, hearing, and sense of smell.

Meet the tiger. Tigers are mammals too! Tigers are orange or rust-colored with black stripes. Underneath their soft fur is lots of muscle.
